Professor Jean Paul Thiery (SIN)	

AWARDS - Prizes announced before the meeting.

- **Betty Hay Award**
- **TEMTIA Poster Award**
- **TEMTIA Travel Bursaries**

Registration

Epithelial-Mesenchymal Transition (EMT) is a cellular process where cells in an epithelium acquire the ability to invade the underlying extracellular matrix or adjacent tissue. It is a normal process in development used for the formation of three-dimensional structure in the embryo but is usually associated with pathologies in the adult.

This meeting is designed to bring together Developmental Biologists, Cancer Biologists and Pathologists, who might not normally interact in discipline-specific meetings, to discuss the common and disparate elements of EMT in their research. We expect that results presented in the areas of cancer metastasis, organ fibrosis, wound healing and embryonic development will lead to new insights and approaches that will move each of the respective research fields and advance health research.

Platform talks will be given by a combination of senior investigators in the field and newer investigators selected from submitted abstracts. Substantial poster presentation time will enable each participant to share their work with the other attendees.

Important Dates see Website for full details:

Awards application deadline: June 5, 2015

Oral Abstract Submission deadline: June 5, 2015

Discount registration deadline: June 5, 2015

Registration payment deadline: June 5, 2015

All deadlines end at 6.00pm AEST
